KESSLER FOUNDATION

Speed of Processing Information

If you:

- have Multiple Sclerosis
- are between the ages of 18-59
- are experiencing significant problems in how quickly you can process information
- have no other neurological illness

You are invited to participate in a new study examining a computer technique designed to improve the speed at which you process information.

** All visits will be completed at Kessler Foundation in West Orange, NJ
If you do not have transportation, home visits can be arranged
** You will be compensated $225 for your time**

What does it require?

- 8 months of participation
  - <u>Week 1:</u> one 3-hour visit for pencil and paper testing and questionnaires
  - <u>Weeks 2-6:</u> two 1-hour sessions per week during which time you will either (1) undergo an experimental treatment designed to improve how quickly you can process information or (2) participate in computer exercises
  - <u>Week 7:</u> one 2-hour visit for follow-up pencil and paper testing and questionnaires
  - <u>Months 3-7:</u> depending on what group you are assigned to, either (1) nothing or (2) one 1-hour session per month
  - <u>Month 8:</u> one 2-hour visit for follow-up pencil and paper testing and questionnaires

Principal Investigator: Nancy Chiaravalloti, Ph.D.
